Profile

A fully qualified Computer Engineer with experience as IT Support for network, operating systems and applications at the end user level. I am enthusiastic about developing a career in computer Engineering. My ability to stay focussed under pressure allows me to perform efficiently and with precision in high demand situations. I possess excellent analytical and problem-solving skills with the ability to make independent judgements. I strive to be empathetic, respectful and cooperative in all interactions. I am highly numerate and with a solid mathematical scientific background. With a strong commitment to my personal development and achievement, I endeavour to be resourceful and creative in all my endeavours, bringing a fresh perspective to situations while upholding core company values.

Professional Experience

IT Support and Network Administrator,
Taat Consulting
07/2021 | Harare, Zimbabwe
Information Security and Data Privacy, manage daily backup jobs. Oversee network security. Perform intermediate level maintenance and configuration tasks. Troubleshoot and resolve network communication issues. Support IT approved software for desktop and laptop computers. Configure machines, software, printers and network access. Primarily worked alongside a Senior Mentor, which required maintaining effective communication, ability to learn quickly in order to adapt to an initially unfamiliar environment and enhanced my ability to question and analyze critically.
